Phillip,

We have pumped and tagged the bottom cement plug, everything looks good. We are in the process of pumping the middle cement plug now.

Thanks,
Matt

Phillip,

We have washed to bottom on the NBU #608. We are currently pulling the bit getting ready to run in drill pipe open ended and pump the bottom cement plug. We hope to have it pumped mid-morning today.

Thanks,

Phillip,

We have set and cemented our 9 5/8" surface casing at 550'. Once we get the BOP's nipples up and tested we will be running in with a bit to wash down to bottom and pump the 1st cement plug.

Phillip,

I wanted to shoot you a quick update on the NBU 608 surfacing well. We got 13 3/8" conductor set to 160' and cemented the middle of last week. We moved in the drilling rig over the weekend and plan to spud in on the well around noon today. I'll continue to send you updates as we progress with the plugging operations.

Regards,

Matt Robertson | Operations Manager |
